Hello Hapeville Family!

I hope and trust this finds you well, safe, and healthy. It is a pleasure to serve you and the Hapeville Charter School community, and in an effort to assist and provide additional measures of awareness and mitigation, we, with the support of the Hapeville Charter School Board, have formed a partnership with **RAS Medical Solution** to provide **free** saliva based COVID-19 PCR testing to students, faculty, and staff.

We are excited about this process because this will help keep our students and staff safe. The test uses saliva, so there is no nasal swab, no needle stick - just saliva in a tube, and **at no cost**. RAS Medical Solution will be providing the results to participants via email within 24 to 48 hrs. Additionally, HCS student and staff family members may also participate if desired. We will be testing weekly and ask your participation in making this process a smooth and efficient one.

Below is a list of things to get us started:

1. In order to start the process, sign up using the link below (Please click on the "Sign up" button). This will ensure that your information is entered correctly, and you receive your results by email. ***The school will not see/receive results – results will be sent directly to the email used during sign-up.*** https://rasmedicalsolutions.prognocis.com/prognocis/rasmedicalsolutionsClinicIndex.html

2. The test is self-administered and easy to conduct.
   - The patient will first fill out a consent form and legibly write/print their information.
   - Next, the patient will spit into the tube up to the "2" mark.
     (Just natural saliva please; no mucus or coughed up saliva)
   - Finally, the patient will use the alcohol prep pad to wipe the exterior of the tube and place it back into the bag.
   Note: A video in English and Spanish of how to self-administer the test and will be posted soon.

3. If issues arise with obtaining your results after 48 hours, please email RAS directly at info@freecovidtestga.com.

We thank you for your continued support and understanding. Together we can ensure safe and healthy learning and teaching environments for all. Stay safe, stay healthy, and stay masked!

Respectfully,

Mike Ramos, DBA(c), MBA
Executive Director
Hapeville Charter Schools

COVID-19 SALIVA PCR TEST

NO SWAB! NO BLOOD! JUST SPIT!

About Us

RAS Medical Solution is a locally owned and operated laboratory in the state of Georgia that provides fast COVID-19 testing, including emergency same-day results. Our saliva based COVID-19 test will make testing easier and safer for everyone.
